köşeli taşlar

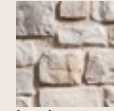

Bu ürün grubu, boyutları düzenli ve genellikle köşeli şekillere sahip taş dokularından oluşmaktadır. Bu taşların formal görünümleri, Orta Çağ kalelerinin, görkemli şatoların gücünü yansıtabileceği gibi modern kreasyonların zarifliğini de kolayca ortaya çıkarır.

düzensiz taşlar

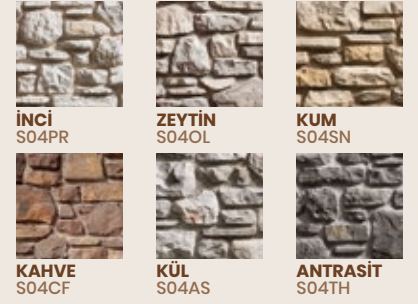

Bu grup, çoğunlukla taşkın bir nehir tarafından yıkanmış veya tarihi Anadolu ve şiiresel Toskana'nın taş ustaları tarafından şekillendirilmiş. Büyük boyutlu düzensiz taşlardan oluşur. Asırlık köylerin şiiresel uyumunu ve kalıcı özelliklerini yansıtacak şekilde tasarlanmıştır; bir dağ evinde büyük bir şömine ve geniş bir istinat duvarı.

yassı taşlar

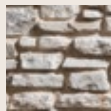

Bu seri, tıpkı doğa tarafından özenle işlenmiş gibi yassı taşlardan oluşur. Bazıları büyük bir nehir tarafından yıkanmış, bazıları ise kanyonlarda rüzgar ve yağmurla aşınmış gibi. Diğerleri ise, geçmişte İnka medeniyetinde virtüöz bir taş ustasının elinden çıkmışçasına şekillendirilir.

derz etkisi

Geleneksel, tarihi veya modern bir doku yaratmak istediğinizde, seçtiğiniz taş kadar uyguladığınız derz de çok etkilidir. Derz uygulamasında altta gösterilen teknikleri uygulayarak, aynı ürünle çok farklı etkiler yaratabilirsiniz.

YIĞMA

Derz boşluğu bırakılmadan yapılan yığma uygulama.

STANDART DERZ

Özel bir işlem yapılmadan uygulanan standart derz tekniği.

TAM DOLU DERZ

Tam dolu derz uygulamasında, taş aralarındaki derz boşlukları taşın yüzeyine kadar doldurulur ve bozuk yerlere hafif müdahale ile tamamlanır.

KABA DERZ

Derz dolgusunun bazı yerlerde taş yüzeyini bile geçmesi, derzleri daha geniş gösterir ve uygulandığı yerde eski çağlardan kalan bir doku yaratır.

TAMAMLAYICI ÜRÜNLER

Stonewrap markalı tamamlayıcı ürünlerin kullanılması, uygulamanın uzun ömürlü olmasını ve daha doğal görünmesini sağlar.
